Alma Mater—Carmen Ohio

Led by

Jonathan Crosse

Member of the Class of 1968

O come let's sing Ohio's praise
And songs to Alma Mater raise
While our hearts rebounding thrill
With joy which death alone can still;
Summer's heat and winter's cold
The seasons pass, the years will roll;
Time and change will surely show
How firm thy friendship—Ohio.

The Recipients of Honors

WEIKKO A. HEISKANEN

DOCTOR OF SCIENCE

World leader in geodesy, founder of this University's Department of Geodetic Science, genius at stimulating students and colleagues to productive research

Weikko A. Heiskanen is without question the world's most eminent and influential geodesist, and The Ohio State University may well rejoice at the honor of having been the beneficiary for 15 years of his activity on this faculty.

After a long and brilliant career in Finland, Dr. Heiskanen came to the United States in 1950. Under the initial aegis of Ohio State's Department of Geology, he founded on this campus the first department of geodetic science in an American university. Today that department is recognized and respected the world over.

Dr. Heiskanen is the author of some 140 books and articles covering a wide range in geodesy, 82 of which are original contributions to knowledge and all of which have figured in the advancement of his science. His studies of gravity data and their relation to the condition of isostasy in the earth's crust have created an important bridge between geodesy and its sister science of geology, and they will ever stand as classic in their realm. His work in devising the global geodetic system that unifies the work of geodesists all over the world has brought international fame to this University.

While at Ohio State, he organized symposia that brought together several brilliant assemblages of scientists from all parts of the world and, by the cross-fertilization they engendered, advanced the geophysical sciences at large.

Dr. Heiskanen has evinced real genius at stimulating students and colleagues to outstanding accomplishment in a wide variety of geodetic and related fields. His imprint upon these sciences therefore extends far beyond the results of his own individual research.

No less than 30 high honors have come to Dr. Heiskanen, many of international significance. The Ohio State University now takes great pride in adding its accolade to this impressive array, in clear recognition of the great contribution he has made to his field and to the excellence and worldwide reputation of this University.

LISTER HILL

DOCTOR OF LAWS

Dedicated public servant and architect of legislation which has raised to new heights the level of health and education of the American people

Lister Hill, United States Senator from Alabama, has devoted his creative energy and interest to the strengthening of the health and education of this nation.

Son of a dedicated surgeon, bearer of the name of Dr. Joseph Lister distinguished in the medical history of the world as a pioneer in antisepsis, Senator Hill brought to the councils of government a mind hospitable to the great traditions of medicine. During a career of more than four decades in the Congress of the United States, he labored to fashion the tools and to lay the foundations for medical research and education and to provide those facilities that will make possible the "Golden Age of Medicine" which he has foreseen for the world.

Honored throughout the United States as the "Statesman of Health," recipient of the late President Kennedy's accolade as "the outstanding Congressional leader in the field of medical legislation in the nation," Senator Hill was the chief architect of the Hill-Burton Act which has provided hospital facilities throughout the United States, including 20,000 beds in 300 hospitals in the State of Ohio.

The National Institutes of Health are largely the legislative creation of Senator Hill. He has led the legislative fight against mental illness and mental retardation, and he has been the principal initiator of legislation expanding health education and training and strengthening public health programs and aid to the handicapped.

The Ohio State University is among the host of institutions which have been the beneficiaries of Senator Hill's vigorous leadership in the field of education. To cite but two legislative landmarks in his long career, he was co-author of the GI Bill of Rights and author of the National Defense Education Act, and he has been a Congressional leader and national spokesman for virtually all legislation involving organized education at any level.

In recognizing Senator Hill, The Ohio State University pays tribute to a lifetime of public service and to the almost unending array of major accomplishments in the fields of science, health, and education which that lifetime of service has produced.

KARL SCHWARTZWALDER

DOCTOR OF SCIENCE

Creative engineer and scientist, effective administrator, distinguished humanitarian and leader in the education of young people

Throughout his professional career, Karl Schwartzwalder, director of research and development for the AC Spark Plug Division of General Motors Corporation, has demonstrated an insatiable curiosity about materials and their behavior. Today, almost all alumina products manufactured follow closely the results of his pioneering research in alumina ceramics and the disclosures of the more than 50 patents issued to him.

A graduate of The Ohio State University, from which he received the Bachelor of Ceramic Engineering and Master of Science degrees, he has been with the General Motors Corporation his entire professional career except for periods of service as a consultant to government scientific groups and technical and scientific societies.

Mr. Schwartzwalder was a scientific consultant to the Manhattan Project and has served on committees of the National Bureau of Standards, the National Science Foundation, and the Atomic Energy Commission. He is a member of many professional and learned societies, among them the American Ceramic Society which he has served as president and the American Association for the Advancement of Science.

For his ingenuity and creative ability in the engineering and scientific fields, Mr. Schwartzwalder has been honored in many ways. In 1959, he was chosen by this University as a Distinguished Alumnus.

Mr. Schwartzwalder's outstanding professional accomplishments have been closely rivaled by civic contributions, particularly in improving educational opportunities for young people in his community. He is the founder and president of the "Five Talents" educational program to challenge the minds of the brightest youth in the Flint-area parochial high school system. He has given much of his time to stimulating the interest of young people in science and to cultivating in them a strong moral and religious fiber.

Karl Schwartzwalder has demonstrated extraordinary ability as a scientist and engineer in the ceramic and automotive industries and has found time to give liberally of his talent in service to others. In every way, his career has indeed been one of great distinction.

The Academic Costume

The American Council on Education through the cooperation of its institutional members has established the Academic Costume Code which has been adopted almost completely by institutions of higher learning in this country. The following information is provided for the benefit of visitors to academic ceremonies at The Ohio State University.

The Gown

- Bachelor: Black, full cut with long pointed sleeves.
Master: Black, long or short sleeves with arc-shaped panel extended from each sleeve.
Doctor: Black, with velvet panels on front of gown and three velvet bars on each sleeve. Color of the velvet may be black or distinctive of the field of study.

The Hood

- Bachelor: *Three feet in length with a two-inch wide velvet.
Master: *Three and one-half feet in length with a three-inch wide velvet.
Doctor: Four feet in length with a five-inch wide velvet and panel at the sides.
* Not usually worn by candidates for a degree.

The lining of all hoods, which is folded out, bears the official colors of the institution from which the degree was received. The color of the velvet on all hoods indicates the field of study as follows:

Cap and Tassel

Candidates for degrees at The Ohio State University wear the black mortarboard with a tassel the color of which is distinctive of the school or college from which they are graduating. The tassel colors representative of The Ohio State University colleges and schools are as follows:

Graduate School.....	Black
Colleges of the Arts and Sciences.....	White
College of The Arts	
School of Music.....	Pink
College of Biological Sciences	
College of Humanities	
College of Mathematics and Physical Sciences	
College of Social and Behavioral Sciences

To Our New Alumni:

Welcome, a warm welcome, to the ranks of the alumni of The Ohio State University. Back in 1878 there were six alumni—new and untested. This small group has grown in 1968 to a body of more than 156,000 who have received degrees here, and our loyal Ohio State University Association has built the second largest organized constituency that exists among universities today.

The modern alumnus is a dedicated servant of education. The fruits of a good education—the critical mind, the discerning spirit, the higher values, the sense of commitment, and the privilege of service—are exemplified in tens of thousands of our products.

In a very real sense, the alumni are members of the family and full-fledged partners in the enterprise—in Ohio, in the nation, and throughout the world.

What can you do for the University? There seems to be general agreement on four major services which alumni can be counted on to render: 1) the ambassadorial service of representing Ohio State well wherever they go; 2) the service of strengthening Ohio State's resources through participation in the Development Fund; 3) the recruiting service of well-qualified students to Ohio State; and 4) the advisory service of strengthening Ohio State's role in society.

A great university is composed of many diverse people and many diverse ideas; so is society as a whole—and our alumni are the people best able to provide the vital link between our campus and its environment. With your assistance, we cannot fail to meet this challenge.

The University extends to you a year's free membership in the Association and with it will come automatically a subscription to THE MONTHLY, a magazine devoted to the task of helping you "keep in touch" with our exciting pursuit of human excellence.

Congratulations to you—and to your families and friends. You are joining a great family, for Ohio State is permanent among so many impermanencies. Your University is something to come back to—growing ever more rich and mellow in spirit.

We invite you to join with all alumni in looking ahead to 1970 when the entire University community will participate in observance of our 100th birthday. Alumni-sponsored Charter Day, March 22, 1970, will be a highlight of the University's Centennial Celebration!

Sincerely,

WILLIAM E. KNEPPER
